

ANTI-DUST HOODS

Dust control may be essential in the case of volatile powders or with high emission of fine particles. Our anti-dust hoods for emptying bags hoppers are designed to make the operator's working area as healthy as possible, with evolutionary and adaptable models to satisfy your requirements.

MODEL H1 – Compact with possible aspiration in rear part of the hood

MODEL H2 – Ergonomic with interior deflector and possible aspiration on the top

MODEL H3 – Ergonomic with chassis and integrated filter
