

Standard “plug & play” mobile unit for vertical sugar conveying

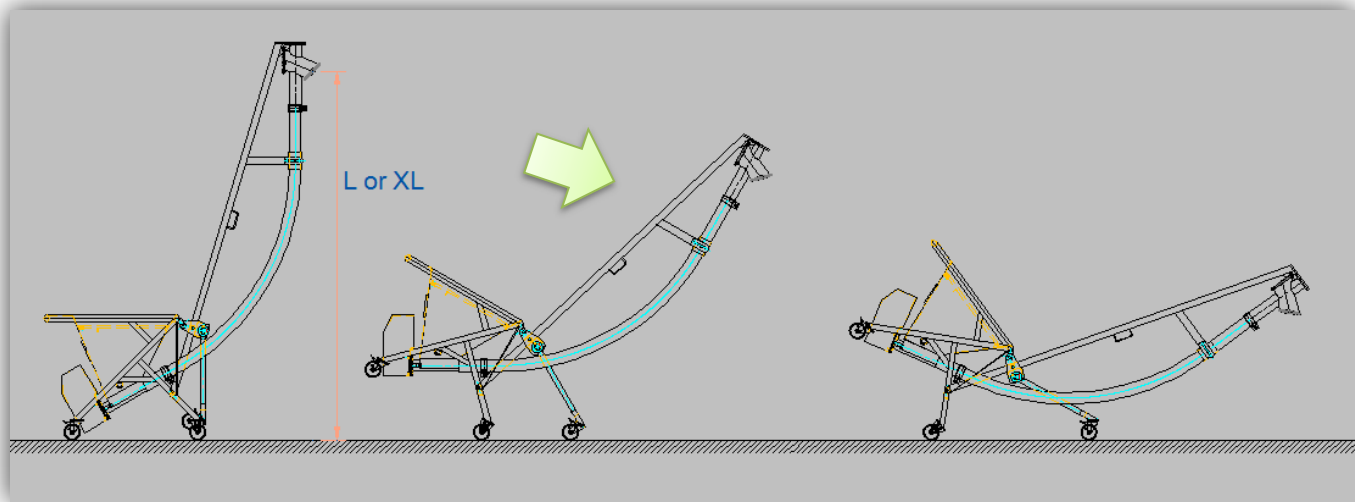

Based on 55 years' experience and knowledge in **Mechanical Flexible Conveying technology** for all powders, SUGAR INPROCESS has developed a special portable and **easy to start** equipment for the vertical conveying of sugar. This plug and play equipment is available for sugars from 300µ granular size or fine sugars with the vibrating device in option.

The SME series are specially designed with ergonomic bag emptying hopper on wheels and integrated vertical elevator to feed several discharging points. The system can be tilted for cleaning operations.

Some options are specially studied for pharmaceutical requirements.

TECHNICAL DIAGRAM

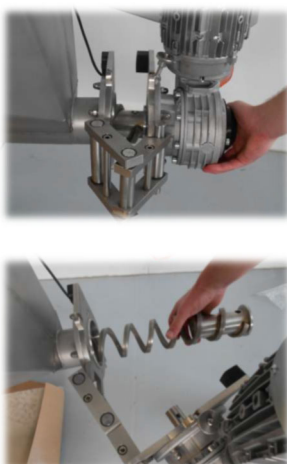

Version Sugar SME **L** = 2800 mm

Version Sugar SME **XL** = 3800 mm

One working position and two tilted positions (cleaning or manipulation)

OPTIONS

OPTION **VIB** = Vibrator for flowing assistance

OPTION **HF** = Hinge flange for quick and easy motor/spiral disconnection (with security detection)
